

# Protect Your Reputation and Profits

## Advanced Technology for Banking & Finance

In today's complex and high-volume transaction environment, progressive banks and financial institutions are using data analytics to uncover potential fraud and mitigate risks such as fines and reputation damage.

### Proven Solutions to Help You:

- Turn massive amounts of data into meaningful insight
- Catch fraud, errors and suspicious activity
- Enhance regulatory management ratings
- Improve operations, compliance initiatives and public image
- Automate time-consuming tasks to increase efficiency

A technology-driven approach gives banks more insight into their transactions to help identify risks that may have slipped through control systems. Our purpose-built solutions significantly reduce losses and provide leadership with reliable information to make informed decisions.

**More than 17% of financial services organizations were victims of fraudulent activity.**

We've fully equipped our staff with CaseWare IDEA® because the level of efficiency we're able to achieve offsets the software expense. It simply outperforms Excel when working with large, complex data. Without it, we wouldn't be able to achieve what we've been asked to do.

— **Vincent Banks**, Senior Audit Director, Business Risk Office, GreenSky LLC  
Director, BDO, USA LLP

**Make data-driven decisions powered by analytics.**

# Improve Your Risk Management, Control & Governance Processes

## Powerful Tools. Definitive Results.

Our purpose-built solutions for banking and finance are fully integrated with CaseWare IDEA®. It is the leading data analysis tool designed to identify internal control weaknesses, mitigate risks and improve decision making.

Uncover the red flags of potential fraud, errors, omissions, bypassed controls and compliance violations with the Financial Services Suite. These pre-developed tests provide complete coverage for analyzing deposit accounts and loan data.

Boost your productivity with the Financial App. This collection of 55+ tests and reports is designed to detect issues with critical areas including general ledger, accounts payable, accounts receivable, fixed assets and inventory.

Our solutions come with implementation assistance and unlimited access to support for rapid success.

- Proven and accurate
- Deliver immediate ROI
- Eliminate guesswork
- Test 100% of transactions
- Improve bank management ratings
